CAREER OBJECTIVE

A dedicated Information Technology graduate and current Master of Science in IT student seeking an entry-level Associate Software Engineer or Technical Virtual Assistant position. Brings foundational knowledge in PHP, Laravel, web development, database management, and technical support, with strong organizational, communication, and problem-solving skills. Highly adaptable and eager to learn new programming languages, tools, platforms, and workflows through hands-on experience and corporate training while contributing to team success.

EDUCATION

Jose Rizal Memorial State University (JRMSU)

Master of Science in Information Technology (MSIT)

Dapitan City, Philippines

2024 – Present (Ongoing)

**Northwestern Mindanao State College of Science and Technology
(NMSCST)**

**Misamis Occidental,
Philippines**

Bachelor of Science in Information Technology (BSIT)

2018 – 2024

TECHNICAL SKILLS

Core Frameworks: Laravel

Languages: PHP, JavaScript, HTML, CSS

Frontend & Styling: Tailwind CSS, Bootstrap

Databases & APIs: MySQL, RESTful API Development & Integration

Tools & Version Control: Git, GitHub, Visual Studio Code, Postman, Composer, XAMPP, WampServer

Cloud & Systems: Basic Cloud Hosting Deployment, Domain & SSL Configuration

PROFESSIONAL EXPERIENCE

Freelance Web Developer

Self-Employed

Philippines

2022 – Present

- Assisted student clients by developing simple, responsive web-based systems for capstone projects, focusing on fundamental CRUD operations and role-based login security.
- Built custom business backend logic using PHP and the Laravel framework according to simple requirements provided by clients.
- Designed, organized, and managed relational data architectures using MySQL databases.
- Integrated essential third-party communication tools, such as SMS notification gateways for reminders and updates, and simple online payment fields.
- Configured basic cloud deployment environments, including linking domains and activating SSL security certificates.

IT Instructor*NMSCST***Labuyo, Tangub City, Philippines***Aug 2024 – Jun 2025*

- Taught basic theoretical concepts and conducted introductory hands-on sessions in core IT subjects such as programming, database management, and networks.
- Supported undergraduate students in debugging simple programming errors and troubleshooting application logic during laboratory workshops.
- Prepared weekly lesson outlines and organized learning exercises matching the standardized curriculum.
- Assisted institutional compliance efforts and provided minor operational support for internal school system architectures.

Mobile Teacher*CMG-Computer Skills Training Center***Misamis Occidental, Philippines***Jul 2021 – Mar 2024*

- Traveled to remote communities and local barangays to bring introductory digital literacy education to individuals without regular computer access.
- Assembled portable training equipment, including laptops and projectors, to establish functional, temporary learning facilities.
- Taught basic productivity tools including Microsoft Office 365 (Word, Excel, PowerPoint) and elementary web principles.

SEMINARS & TRAINING

- **Seminar-Workshop on Leveraging Tabular Data and Time Series Analysis for Impactful Machine Learning Research** – Learning fundamental data structures and analytical research processes (2025).
- **Academic Integrity in the Age of AI: Developing Ethical and Transparent Governance Policies** – Understanding ethical technology application and compliance frameworks (2025).
